

Make it easy for your customers affordable, easily accessible storage for every need

ELTS mechanical lockers are ideal for airport, rail, boat and coach terminals, shops, sports facilities and amusement parks.

Our business concept is to provide lockers free of charge and share the revenues. We bear the cost of the investment, installation, maintenance and replacement parts, at no

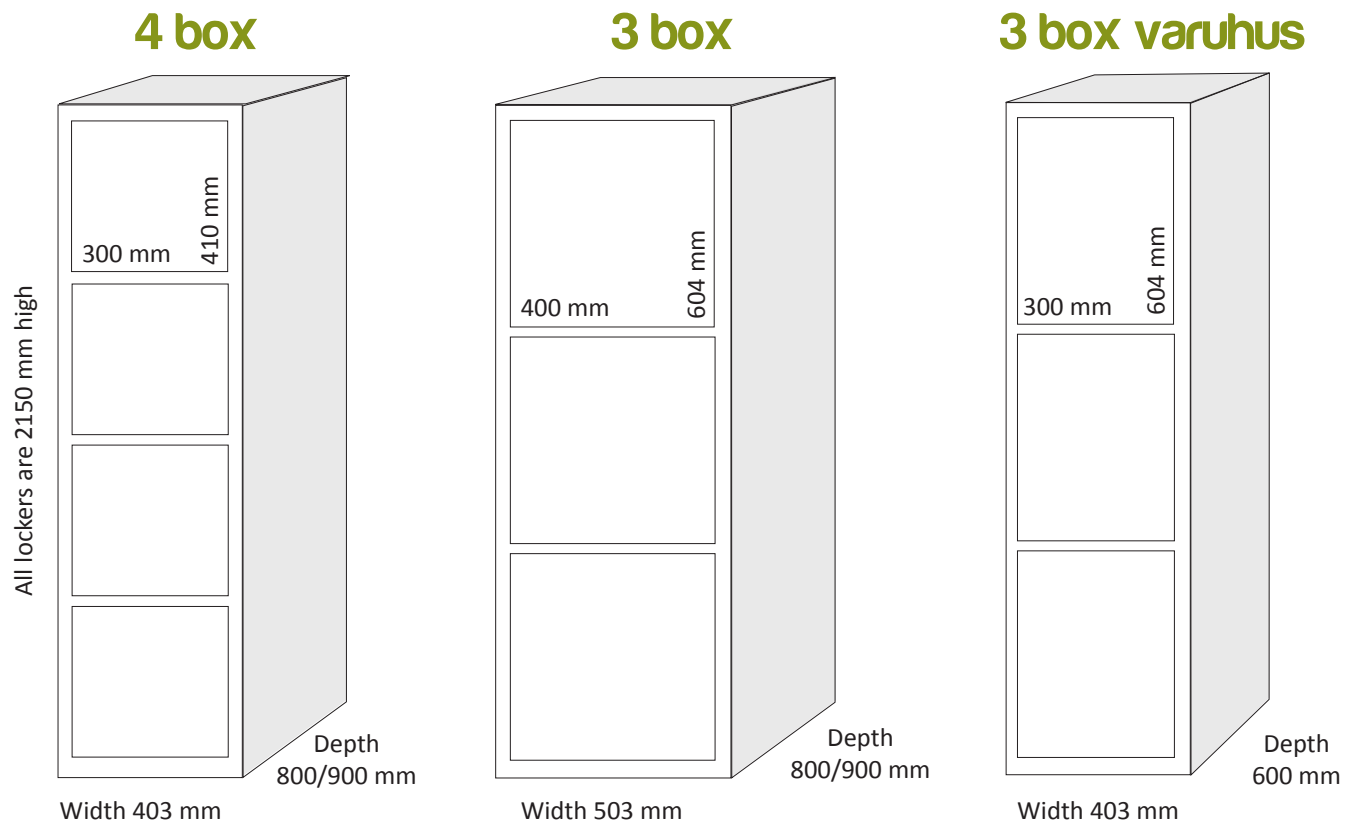

cost to you. All you need to do is provide the floor area, check that lockers are emptied and account for the revenues to us using predetermined procedures.

It's a simple way to offer your customers a storage service, with no investment costs for you.

Technical specifications: see next page

Technical specification

- ELTS mechanical lockers are manufactured from 2 mm galvanised sheet metal, to guarantee extended durability. The coin-operated mechanical lock makes it easy for operators to replace any broken locks or cylinders.
- The frame and base are made of galvanised sheet metal, with doors in duralumin or smoked plastic.
- Door sizes: 4-compartment, 3-compartment (in height) and a 3-compartment with clear plastic doors for retail lockers.
- Standard ELTS colours
- Coin-operated lock for one, two or three coins
- Key locking
- Coin collecting box
